# DEVINE

## PRO 800

Professional DJ headphones

User manual

# Introduction

Thank you for purchasing these Devine DJ headphones. Before you unpack all the received items, carefully read this manual to become familiar with the functions of the microphone. Also check the contents of the box to make sure all necessary parts are included.

If the headphones fail to operate properly, or if you have any problems while using it, check all settings on your mixer or audio playing device and see if the headphone will work on another source.

**Box contents:**
- Devine PRO 800 DJ-headphones
- Artifical leather storage and transport pouch
- 3.5mm to 6.35mm stereo jackplug adapter

**Warning!**
- Do not open the housing of the headphones. There are no user serviceable parts inside.
- Keep the headphones away from intense sunshine, humidity, dust and liquids
- Avoid shocks, large weight pressure, collision and extreme motion of the hinges.

**Features:**
- DJ headphones
- closed construction
- suitable for use in noisy environments
- foldable design
- swivel mechanism for each cup, 90 degrees
- padded ear cushions and headband
- adjustable headband
- soft ear cushions (synthetic leather)
- partial spiral cable
- cable-length: 1.5 m (4 m when fully extended)
- 3.5 mm gold-plated jackplug connector
- included gold-plated jackplug adapter 3.5 mm – 6.35 mm
- included pouch for easy transport

- drivers: 57 mm
- impedance: 64 Ohms
- sensitivity: 107 dB (+/- 3 dB)
- frequency response: 5 Hz – 30 kHz
- maximum power: 3500 mW

**NOTE: Illustrations in this manual are only for your reference, illustrations might be slightly different from the actual product**

# Special features of the PRO 800 headphones

- Powerful 57mm drivers, for optimal frequency response from 5 Hz up to 30 kHz.
- Accurate bass reproduction thanks to large format drivers
- Low impedance, works with less powerful music sources such as MP3-players, smartphones, tablets and other multimedia devices
- Included adapter plug, useable with almost every headphone-output available
- High sensitivity for optimal sound reproduction with minimal power requirements
- Large maximum power handling (3500mW)
- Semi-spiral cable, gives every DJ freedom around the DJ-booth without having to worry about his or her headphones. Standard length of 1.5m, +/- 4m when fully extended
- Adjustable headband with padded top for optimal comfort and fitment
- Foldable construction, folds into a small package
- Included storage pouch with artificial leather finish, for easy transport and protection
- 90 degrees swivel earcups, gives the headphones a flexible construction and makes quick one-ear-monitoring possible
- Comfortable and padded artificial leather earcushions
- Closed construction for better reproduction of low frequencies

**WARNING:**
These headphones are capable of producing high volume levels, which may cause permanent hearing loss when used incorrectly. Devine recommends to keep the volume of these headphones on a moderate level.

When the surrounding ambient noise (background noise or a PA-system) is so loud that the headphones can not compete on a moderate level, consider using earplugs to protect your ears against the high sound levels that these headphones are capable of producing.
This gives you the advantage of being able to turn up the volume of your headphones and hearing the bass line for beatmatching purposes, without causing damage to your ears, thus preventing possible hearing loss.

Please note that the PRO 800 is capable of producing sound levels at more than 100 dBA, as where a volume level of 80 dBA is the threshold of possible hearing damage over an extended period of time.

**Devine is not responsible for any damage or injury caused by improper use of this product.**
